

🚀 Albertons Studio - Portfolio

Professional portfolio website showcasing premium landing pages and web development services.

The screenshot shows a dark-themed website for 'Albertons Studio'. At the top, there's a navigation bar with links for Home, Why Me, Services, Portfolio, Testimonials, Pricing, Contact, a light/dark mode switch, and a language selector (EN). Below the navigation is a search bar with the placeholder 'Albertons Studio'. The main title 'High-Converting Landing Pages That Turn Clicks Into Customers' is displayed in large, bold, blue text. A subtitle below it states 'Websites and funnels built with React, AI-tools and modern design principles.' Two buttons are present: 'Free Consultation →' and 'View Portfolio'. On the right side of the header is a three-line menu icon. The main content area features a section titled 'Why Choose Me' with three icons: a lightning bolt (fast performance), a document (responsive design), and a star (multilingual support). The overall design is clean with a blue gradient background.

✨ Features

- 🌐 **Multilingual Support:** Available in 4 languages (Hungarian, English, German, Serbian)
- 📱 **Fully Responsive:** Optimized for all devices
- ⌚ **Modern Design:** Clean UI with blue gradient theme
- ⚡ **Fast Performance:** Built with Vite and optimized for speed
- ✉️ **Working Contact Form:** Integrated with Web3Forms API
- 🖼️ **Portfolio Carousel:** Swiper.js image galleries for projects
- ♿ **Accessible:** WCAG compliant design
- 🔍 **SEO Optimized:** Meta tags, sitemap, robots.txt

🛠️ Tech Stack

- Framework: React 19 + TypeScript
- Build Tool: Vite 7.2.2
- Styling: Tailwind CSS 3.4.16
- i18n: react-i18next
- Icons: Lucide React
- Carousel: Swiper.js
- Forms: Web3Forms API
- Deployment: Vercel

🚀 Getting Started

Prerequisites

- Node.js 18+
- npm or yarn

Installation

```
# Clone the repository
git clone https://github.com/Albertons03/albertons-portfolio.git

# Navigate to project directory
cd albertons-portfolio

# Install dependencies
npm install

# Start development server
npm run dev
```

The site will be available at <http://localhost:5173>

Build for Production

```
# Create production build  
npm run build  
  
# Preview production build  
npm run preview
```

⌚ Featured Projects

1. AI-Powered Customer Support SaaS

[Live Demo](#) · [GitHub](#)

Full-stack SaaS application with React, FastAPI, Supabase & OpenAI. Users can chat with AI 24/7, all messages saved.

2. Marketing Analytics with AI Chatbot

[Live Demo](#) · [GitHub \(private\)](#)

Analytics dashboard and AI chatbot for marketing teams. Ask questions, get instant insights, and visualize your data. Built with FastAPI, OpenAI, React, Supabase, Tailwind, deployed on Vercel & Railway.

3. SmartFit Pro X - Fitness landing page with modern animations

4. Vienna Personal Trainer - Multilingual personal training website

5. Career Code Coach - Professional career coaching platform
